Questions

- Do I need to cite the formal definitions or can I just think of them myself?
- How detailed should the "Methodology" section be?
- Should I also include the experiment with the random forest at different budgets predicting the fid? If yes, where?
  - Because of the findings from this experiment, I chose the function-specific labeling for the selector
- Use of Figures, how do I cite them if in the paper that I am referring to, they are taken from another paper?
- If I do plots for the results, is there any nice way to create nice looking plots?
